

7 Essential Nutrients Your Liver Needs If You Want To Drink!

Now, keeping your liver healthy and enjoying a few drinks is finally possible.

Worryingly, many drinkers put their concerns about liver health to the back of their minds because it seems all a bit too hard to think about and that's a huge worry!

The problem is...

It can be a quick, slippery slope to a damaged and diseased liver... which is not where any drinker wants to go!

Because once you get there, you can't go back. Which means you can never drink again.

WARNING: If Your Liver Looks Like This... **YOU CAN NEVER EVER DRINK AGAIN!**

Now, if it sounds like I'm trying to scare you... I'm not!

I just don't want this to happen to you, and I know this is not what you want to happen to yourself!

Now, I am not here to lecture you or try to make you feel bad.

I know it's not your fault that you may have partied a lot in your past because that is what young people do!

We all have!

Instead, I am going to introduce you to some emerging studies that back up what the money-greedy pharmaceutical giants are hiding from you.

I want to guide you and take you in the right direction that steers you away from the guilt-ridden feelings of...

'I wish...' or 'It's probably too late.'

The good news is your liver is an amazing organ that can, in most situations, replenish and rejuvenate itself with the right resources.

You just need to arm yourself with the right knowledge about how to do this...

And that's why I am going to give you bona fide resources of liver health awareness that you can be in control of...

That liberates you from worrying about your liver less, so you can get on with your life and bounce out of bed knowing you are taking some responsibility for your own liver health.

I am excited to announce to you this 'one of a kind' liver supplement especially designed for people who like to drink alcohol.

It is the perfect solution to help support men and women who want to drink and look after their liver health too!

The liver is the primary detox organ in your body.

It's like the washing machine of your body...

Imagine If You Could Add Just 7 Natural Nutrients Into This 'Washing Machine' To Keep You Healthy And...

Protect against toxic pollutants, including alcohol, so that your liver can function better

Help support the release of toxic by-products that come from drinking alcohol so that your liver can process alcohol better

Support a healthy inflammatory response in the liver so that you can embrace a healthier life, knowing you are doing something positive

Improve gut health so that you digest and eliminate foods much more easily

Lose liver fat which means your liver is functioning better

Lose belly fat so you stop wearing those over-sized t-shirts and baggy pants

Support healthy liver cells so you have more natural protection

You see there is one thing that drinkers don't realise...

It's just not the liver that is affected when we drink...

And here's the icky bit...

No matter what type of alcohol you drink, once it hits your stomach, it's like drinking bleach!

The booze strips away your healthy gut flora that strengthens your immune system.

Each beer, wine, whiskey, bourbon or whatever you drink is washing away and killing important gut bacteria that keep you healthy.

What is even more shocking is poor gut bacteria can lead to reflux, bloated stomach, inflammation, allergies and, as we all know... unwanted weight gain!

And these are just a few of the 100's, if not more conditions that can happen when your gut isn't working as well as it should.

The medical profession is finally acknowledging that if you support the health of your liver sooner, the entire body will thank you BIG TIME!

So, if you are a drinker, it makes sense to try and figure out how to help strengthen your liver, so it works better!

Of course, you could quit drinking, which is an option but...

Most drinkers don't want to stop drinking!

As an adult, we all have choices in life, and being a drinker is your right.

Drinkers want the best of both worlds. They want to keep drinking and have a healthy liver which might seem a bit confusing but trust me...

I'll show you how this can be possible as you read on!

Being An Alcohol Reduction Expert, I Know Only Too Well **The Fears And Concerns Drinkers Have...**

You see, there is still one thing that baffles me about doctors and their limited knowledge about liver health.

There is one consistent question drinkers ask their doctor that I believe is never truly answered!

And I can assure you it's not because your doctor doesn't care...

It's because, at Medical School, they hardly spend any time at all learning about this vital organ.

When you think about it, it is kind've bizarre considering how many years they study how to help patients become well!

In fact, this is the EXACT question I am going to share with you that is not being fully answered correctly...

It's what causes unnecessary confusion about liver health for drinkers.

Not to mention a drinker being embarrassed about asking the question in the first place!

Typically, **A Drinker Starts To Worry About Their Liver Health Around 45+**, Which Is When They Are Feeling More Mature And Established...

I'm talking about the men and women who drink alcohol on a regular basis who have earned their stripes in life...

They've worked hard, raised families, struggled financially, juggled massive ups and downs in their lives and now want to enjoy their life a little bit more.

But this is exactly the time when they need to support their liver health!

Because that's when they start to gain weight... which many put down to the excess calories from booze...

Which is partially true...

However, weight gain has a direct correlation between how well your liver is functioning and how well you process alcohol, as well as other toxins.

You can probably already see I am on a mission here...

To tell you what the doctor's don't talk about...

Because when it comes to this important question...

It never gets fully answered!

And this makes me very angry...

As well as downright determined to stand my ground here...

It's not just your liver that needs some nurturing if you are a drinker!

Your digestive system needs it too!

Bottom line is...

Just because you drink alcohol doesn't mean you should feel like you're in the dog house and that your health should be compromised as much as it has been.

Don't get me wrong I am not condoning excessive drinking here...

In fact, the complete opposite!

My point here is being worried about alcohol affecting your liver health is normal and it is the most common 'secret' fear that drinkers have!

I am here to help you navigate your way to the best liver support while drinking alcohol in healthy ways.

My Name Is **Georgia Foster** And I Have Been Known As The **Alcohol Reduction Expert** Since 1998...

I've been working tirelessly to support drinkers discover how to drink less and get their liver into better shape!

I've been regularly interviewed in the media from Sky News and The Times Newspaper to The Guardian and Psychologies Magazine about my special approach to drinking less alcohol.

The fact is, we live in a drinking society, and if you are anything like me, a 56-year-old Aussie woman who likes her Chardonnay and my 52-year-old British partner Ian who loves his ice-cold beers...

You might worry about the long-term effect of drinking alcohol...

And, I am guessing if you are reading this right now, you like your alcohol too...

On any given day, you read in the media about alcohol causing cancer, heart attacks, weight gain, and many other health conditions, but...

They very rarely talk about what damage alcohol does to the liver!

The truth is... many drinkers don't realize that fatty liver and liver disease are silent killers and often go unnoticed until it's too late!

sky NEWS

Good Housekeeping
PSYCHOLOGIES

THE  TIMES

The Telegraph

You may be thinking you've looked at support for your liver before. But there's a lot of myths and misconceptions out there that can be confusing, misleading, or flat out lies that I am going to expose.

I'm here to help you navigate through all the nonsense and steer you towards the REAL truth with facts, science, and personal evidence collected over the years.

Many people know me as The Alcohol Reduction expert who developed a unique and highly effective program called **7 Days To Drink Less**.

It's been selling worldwide for over 20 years, **helping thousands of men and women reduce their alcohol consumption** and actually come to enjoy a drink rather than just drinking out of habit!

But Here's The Thing... One Question That Consistently Comes Up Is...

"I Am Worried About How Much I Drink And How It Is Affecting My Liver! Georgia, Can You Advise Me What I Should Take?"

For over twenty years I've been telling my drink less customers about many natural remedies, and I have shared with them a long list of the ones that have been proven to support liver health.

The list was extensive (and probably overwhelming), to say the least!

When I went to my local health food store to find a well-balanced liver supplement I was completely confused about what to take!

No matter how hard I looked, I could never find the right combination... That targeted my needs as a drinker.

So, I would buy many things that were “almost” what I needed... but were never quite right. Which cost me a small fortune!

Combining all the different herbs and remedies that I knew were good for me as a drinker cost me well over \$300!

But what was even more tricky was getting the right quantities and balance, so I would take half of one tablet and two of another!

It was crazy! I never really knew if I was getting the right amount.

It was something that bugged me big time.

But the most important point here was...

No one was producing an A-grade liver supplement that included a probiotic for gut health, let alone for people who drink alcohol.

The very specific combination I was looking for just didn't exist!

And when you drink alcohol, you need very specific good bacteria strains, so it can be very confusing to know which ones will be right for you as a drinker...

It was a no-brainer for me that this was the missing link and, more importantly, part of the bigger problem that wasn't being dealt with.

We Know The Gut Is Called **The Second Brain** And For A Very Good Reason

The gut works with the liver to process and eliminate toxins...

And when the gut isn't working right, the liver has to work so much harder...

This is why I wanted something to take the load off my liver. And probiotics were part of the solution.

But the main issue for me and others who drink is the cost of high-quality probiotics...

Because the higher the grade, the higher the price!

When I added a probiotic into my monthly liver regimen ...

The total cost of all of these was nearly \$400.

 Second Brain.

I Used To Dream About **The 'Perfect' Liver** Support For Drinkers But Each Time I Tried To Make It A Reality... **I Got Conflicting Information About Liver Support...**

Then I lost my nerve when I was told I was on dangerous ground developing a liver supplement for drinkers, as I wasn't qualified to decide what should be in the formula.

Which I wholeheartedly agreed with!

However, from all my research, I had a good idea of what would be best ... but I needed to find an expert to back up my idea.

I knew in my heart I needed to pursue my dream liver supplement for drinkers...

Because myself and my customers were spending way too much money buying sub-standard, low-grade mixtures of liver health promises that just didn't do what we needed...

I knew this just wasn't fair. I do question if we were being treated like that because we liked to drink.

Then good fortune knocked on my door when I attended a networking event for Health Experts in Phoenix, Arizona.

I don't want to bring myself down here but...

'I am girl from Melbourne, Australia' and yes in my field I am well known but at this industry event there was some of the biggest health and wellbeing experts on the planet, so I was pretty shy.

And if I am going to be honest, my heart was pounding hoping people would be interested in working with a newbie.

I guess you could call it that co-incidental moment...

Where I was placed at a table sitting next to James Klein...

James has been in the supplement industry since 2001. The products he developed have been sold by the largest supplement retailers and online stores in the world.

He has assembled a team of experts in nutritional science, biochemistry, and nutraceutical manufacturing, allowing him to continually produce products that work.

At first, I was a little bit unsure about telling him about my dream supplement idea...

I was waiting for him to give me the...

'Are you crazy look!'

'What do you mean a liver supplement specially formulated for drinkers!'

Instead, I got a very excited look from James and a huge nod!!!

I got seriously emotional as the tears welled up...

I wrapped my arms around him and couldn't stop hugging him, which was kind've embarrassing for him, considering we had just met.

I was beyond happy and excited.

Because this was a moment in my business life where I felt I had finally found someone who understood my mission.

Finally, someone 'got' me!

James said it was a well-needed supplement and that, to his knowledge, no one had developed this type of formula before.

Because The Fact Is There Is No Supplement On The Shelf That You Can Buy That Covers The Spectrum Of What I Wanted In **My Unique Formula...**

So, what's so unique about my formula?

Well, it has 7 essential Liver Loving nutrients...

LIVER LOVING NUTRIENT #1 Alpha Lipoic Acid

So what is alpha lipoic acid?

Alpha lipoic acid is an antioxidant.

It has a unique ability to support the body's ability to neutralize toxins and chelate (chain together) heavy metals.. ¹

Humans only produce alpha lipoic acid in small amounts. That's why many men and women end up resorting to supplements to optimize their intake.

Red meat and organ meats such as liver are great sources of alpha lipoic acid, but vegetables such as broccoli, tomatoes, spinach, and my favourite brussels sprouts also contain it too.

The issue is getting the high dosage of alpha lipoic acid that is needed. Supplements can stack up to 1,000 times more alpha lipoic acid than food...

It's the concentration that is necessary to get the full benefit that foods just can't do.

What is really exciting is how multi purposed alpha lipoic acid is.

It's an incredible supplement that several studies have shown to support a healthy inflammatory response in the body, which is the precursor to resistance to weight loss.

High levels of inflammation are really bad when you are trying to lose weight because they impact hormone levels, which directly impact your fat cells.

We all know that inflammation is a 'bad cop' but many people don't really know why when you are trying to lose weight.²

Your fat cells do more than just give you a jelly belly or cellulite. They are responsible for hormonal signals that tell your brain to burn fat and increase metabolism.

High levels of inflammation lead to dysregulation of these hormones and contribute to the condition known as leptin resistance.³

Leptin resistance is one of the main causes of weight loss resistance, which basically makes weight loss almost impossible.⁴

As you can see, alpha lipoic acid is not just beneficial to liver health but also great for weight loss.

LIVER LOVING NUTRIENT #2

Milk Thistle

Milk thistle is an ancient herb that has been used for thousands of years to support liver health. It grows natively in Mediterranean countries.⁵

Silymarin is the primary ingredient used in milk thistle.⁶

Milk thistle's antioxidant agents can be extremely valuable to liver health. With Silymarin as its main active element, it assists with supporting overall liver health.⁷

This herb melts away the build-up of everyday toxins.

Because the liver is the primary fat-burning organ, milk thistle is often recommended to aid the body with regular detoxification and faster metabolic rates.

Milk thistle corrects digestion as it speeds up the removal of toxins and alleviates stress placed on the elimination organs, including the liver. The better the liver functions, the more effective it is in metabolising fat.⁸

LIVER LOVING NUTRIENT #3

Ashwagandha

Ashwagandha supports healthy detoxification. This means it is a powerful agent for protecting the overall health of the liver.

Studies show that ashwagandha nourishes your liver and optimizes your natural antioxidant levels.

Ashwagandha is an extremely effective medicinal herb that has a multitude of benefits pertaining to healthy liver function.

LIVER LOVING NUTRIENT #4

L-Cysteine Hydrochloride

L-Cysteine Hydrochloride is an essential amino acid that is used to support overall liver health.⁹

Hydrochloric acids convert insoluble amines such as L-cysteine into water-soluble compounds. When taken, it is absorbed into the gastrointestinal tract quickly.¹⁰

Once it's absorbed in the GI tract, the L-cysteine breaks away from the hydrochloric acid, and the L-cysteine goes to the liver to be converted. When it reaches the liver the L-cysteine turns into glutathione.

This makes it a very powerful antioxidant for liver health.

L-cysteine Hydrochloride has several health benefits, including building the immune system and supporting liver detoxification..¹¹

LIVER LOVING NUTRIENT #5

Green Tea Extract

Green tea extract is a highly concentrated tea source, which has many benefits in aiding liver function.

It is particularly high in antioxidants, and it supports overall liver health.

Some of its other benefits are improved brain function and fat loss. It can help reduce the chance of developing heart disease and offer some protection against cancer.¹²

LIVER LOVING NUTRIENT #6

Turmeric

Turmeric is one of the most effective medicinal herbs that contain important properties.

It is an Ayurvedic herb that has long been used by ancient Indian cultures to aid optimal liver health.¹³

Turmeric can shield the liver from heavy metals that cause toxicity.

Turmeric has proven amazing results in supporting healthy metabolic balances.¹⁴

LIVER LOVING NUTRIENT #7

Dandelion Extract

This is one of my favourite liver herbs and I drink it in a coffee form.

I must admit it is an acquired taste...

My dad says it tastes like 'Cat pee!'

I wouldn't go that far...

(The good news is when you take it in capsule form, you can't taste it!)

Most people know dandelion as a wildflower that grows naturally in many countries worldwide. It is well known for its yellow colour and fluffy blowball that breaks up and flies away in the

wind.

The dandelion has long been taken as a medicinal herb and used as a diuretic to help with stomach, kidney, gallbladder and liver problems.

Dandelion is known to play a significant role in liver support. It also supports a healthy inflammatory response within the liver.

Dandelion root helps to cleanse the liver deeply by eliminating free radicals that interfere with the digestive enzymes produced by the liver. It assists in controlling levels of cholesterol and lipids in the blood.

Dandelion is considered a liver tonic as it powerfully detoxifies the liver and improves the flow of bile.

It is also an excellent herb that flushes out toxins and assists the liver in aiding digestion, and promotes healing...¹⁵

Let's Not Stop At The Top Liver Loving Nutrients Available In **Bridport Health Liver Support...**

Because I knew that we could actually offer a lot more for worried drinkers.

I wanted to make a liver support that I would be seriously proud of...

A liver support that would make a difference to liver health.

So James and I came up with what I guess you could call the Bonus Nutrients that we know make an already great combination even better!

We added these to boost your liver health even more!

Remember, we want you to have a one-stop shopping liver support experience, so you don't have to cram your kitchen cupboards with unnecessary amounts of extras...

As well as the expense of it too.

BONUS LIVER BOOSTING NUTRIENT #1 Ginger Root Extract

Ginger is one of the most used spices in the world, and its medicinal properties have been given by herbalists in many cultures to aid digestion and liver function.

Ginger root protects the liver from 'degenerative scar formation' (fibrosis), according to a study published in 'Nutrition and Metabolism.' It helps combat liver degeneration and increases the organ's antioxidant enzymes. According to researchers, it showed promising results in treating liver fibrosis.

Ginger also supports a healthy liver by reducing oxidative stress on the liver and supporting a healthy inflammatory response...¹⁶

BONUS LIVER BOOSTING NUTRIENT #2

Glutathione

 Glutathione.

Glutathione is considered the 'Master Antioxidant' and is key to regulating the immune system and detoxifying every cell throughout the body. When alcohol is consumed, the whole body suffers. Free radical damage increases, the immune system is weakened, and toxins build up in the body.¹⁷

When you drink alcohol, your body breaks it down into acetaldehyde, which is a reactive compound more dangerous to the brain than the alcohol itself. When glutathione is taken, it greatly assists in 'mopping' up acetaldehyde in the system.¹⁸

Optimal levels of glutathione protect the liver from excess exposure to chemicals, pollutants, bad diet and even wrong yeasts. It repairs liver damage and offers long-term protection.¹⁹

BONUS LIVER BOOSTING NUTRIENT #3

Zinc

Zinc has been found to help support the liver in many different ways. Current research suggests zinc's ability to support a healthy inflammatory response makes it extremely important for proper liver function.²⁰

Zinc is a mineral and a trace element. And because it is a trace element, very small amounts of it are crucial for our health.²¹

Zinc is essential for cell function, including cell growth, repair, division and activation.

It activates DNA synthesis and RNA transcription. Zinc has over 300 enzymes, so even if you have a slight deficiency, it can deeply affect your immunity and liver health.²²

BONUS LIVER BOOSTING NUTRIENT #4

Selenium

Selenium is a trace element which is found in soil.²³

These trace elements are minerals and they live in your tissues in small amounts. They are catalysts in our enzyme system.²⁴

When you consume small amounts of selenium, it contributes to your overall health and, in particular, your liver.

Selenium is a potent antioxidant that removes nasty free radicals from the body.

Your liver cells regenerate when given the right environment, and selenium contributes in a big way to enhancing optimal liver function due to its trace mineral properties.²⁵

Selenium helps to support your DNA.²⁶

BONUS LIVER BOOSTING NUTRIENT #5

The Essential B Vitamins

The Essential B Vitamins.

Vitamin B3

Vitamin B3 plays a significant role in boosting liver health. It helps regulate the metabolism and neurotransmitter balance. Drinking alcohol ruthlessly depletes niacin and it is imperative levels are maintained as alcohol burns the supply quickly.

Vitamin B6

Not only this, people who drink alcohol are more likely to experience low vitamin B6 levels.

Vitamin B6 not only improves liver function; it has many other benefits as well. It helps the central nervous system, aids metabolism and creates neurotransmitters like serotonin and dopamine.

It helps many functions in the body and creates over one hundred enzyme reactions to metabolize fats, proteins and carbohydrates.

Vitamin B12

Too much alcohol depletes glutathione levels in the liver and this lessens the body's ability to produce vitamin B12. In turn the liver's function is compromised and depression and anxiety can creep in.²⁷

Vitamin B12 helps proper red blood cell growth, neurological function, liver regeneration, heart, eyes and bone health and contributes DNA synthesis.²⁸ Acetaldehyde is formed by excess alcohol and it accelerates brain dysfunction.²⁹

Pantothenic Acid (Vitamin B5)

Appropriate levels of B5 are needed for proper liver function.³⁰

Pantothenic Acid is commonly known as Vitamin B5. It supports a healthy inflammatory response and is crucial in controlling the production of cortisol. It helps with the metabolism of fat, carbohydrates, and proteins.³¹

Pantothenic acid is used to manufacture Coenzyme A (CoA), which is an important component of liver function.

A high amount of CoA is focused in the liver and plays a critical role in eliminating toxins.

BONUS LIVER BOOSTING NUTRIENT #6 SL11 Probiotic Blend

 SL11 Probiotic Blend.

Remember how I told you it was difficult to find the right Probiotic blend?

Well, Drum Roll please...

Now for the really exciting news!.

We formulated the perfect Probiotic Blend.

Probiotics have been proven to have a positive effect on liver health.

Probiotics have been used to support overall liver health. They lessen the production of bacterial toxins, help support balanced autoimmune reactions, intestinal absorbency and support a healthy inflammatory response.³²

Lactobacillus Acidophilus

Taking lactobacillus acidophilus has benefits such as protecting and boosting the immune system. It aids the gut and the liver to help absorb nutrients.

Antibiotics kill the friendly bacteria in your body. But taking Lactobacillus acidophilus helps restore good bacteria levels in the gut and is excellent for liver health too.³³

Lactobacillus Salivarius

This probiotic supports oral hygiene as well as gut health. This means your breath will be fresher while your digestive system functions better.

Lactobacillus Paracasei

Recent studies suggest that L.paracasei may assist in combating weight gain. It has been shown to be successful in reducing body fat and visceral fat. Visceral fat is an unhealthy fat that can cover major organs, including the liver.

Lactobacillus Rhamnosus

It promotes weight loss by reducing fat mass and administering leptin concentrations. It also fights against a high-fat diet and can reverse insulin resistance.

Lactobacillus Plantarum

It is a dynamic way of boosting your immunity and fiercely attacks the bad bacteria in our bodies.³⁴

Bifidobacterium Longum

B.Longum stimulated the immune function of people who had received the influenza vaccine.

Lactobacillus Bulgaricus

There is a myriad of advantages of taking this probiotic, including supporting liver health and oral health. It also supports overall health in the intestine walls.³⁵

Bifidobacterium Breve

B.breve is great for gut health, weight loss, immune health, respiratory health and digestive health. It creates an antiviral immune response and supports overall immunity.

It also significantly reduced the fat mass in 52 adults with a propensity for weight gain.

We combined all of these Liver Loving and Boosting Nutrients to make our Liver Formula for Drinker.

Introducing...

BRIDPORT HEALTH LIVER SUPPORT

Protects And Maintains A
Healthy Liver!

 3 Bottles - Liver Support.

But here's the thing...

We know that drinkers can be a little embarrassed about drinking too much and...

Also, sometimes they can feel shamed admitting they like a drink or two and we understand this.

The good news is...

We are here to support YOU and protect you from this negative thinking, so you can start to embrace liver health from a kinder perspective.

Where there is no judgement but 100% commitment to giving you the best liver supplement for drinkers that no one and I truly mean no one else has developed before.

Because not everybody who produces liver support has you as a drinker in mind, but we do!

Figuring out what is the right combination has taken time but the good news is that means you don't have to look any further...

If that pesky worry about years of drinking and its effect on your liver health is getting you down, we hear YOU!

NOW is your chance to do something positive.

The Liver Supplement You've Been Waiting For **IS HERE!**

7 Nutrients Available.

We've spent a lot of time and money on the best research to give you what we believe is the most advanced liver support supplement made specifically for people who like a drink or two.

So, if you want to have all 7 liver loving nutrients and only want to take one supplement... they are available for YOU right here!

14 Day Liver Cleanse Plan

 14 Day Liver Cleanse Plan.

Digital Bonus Product.
Images are for illustrative Effect Only

Many people don't realize that processed foods and foods with a long shelf life are full of chemicals to preserve them, which is highly toxic for the liver.

In just two weeks, by following this easy and (surprisingly tasty) liver cleanse plan, you will be well on your way to a healthier and happier liver.

Delicious easy to prepare meals

Nutrient-dense recipes

Naturally supportive of digestive health

I'm Not Big Into Conspiracies... But It Doesn't Take Much Figuring Out That The Big Pharma And Big Tech Are Hiding All Of These Seriously Important Studies...

There Have Been Thousands Of Medical And Scientific-Based Websites That **Do Not Want You To Know The Truth About**

Liver Health...

Sadly, these websites have been taken down or moved so far down the search engines that it makes them difficult to find.

I've been your liver health detective, so you can be assured it's all here for you right now!

Big Pharma has already tried to censor many people because they want to profit from synthetic alternatives that ironically damage the liver even more!

I guess the choice is yours...

There are natural ways to help your liver be and feel well...

Or the Big Pharma man-made way!

Shareholders of these big companies want to silence people who have your best interests at heart because it takes the profit away from them.

It's scary that we have reached this stage, and I don't know how much longer this website will be available to you.

I would love it if you can hang around a few more important moments, as this is the only place you can place your order for Bridport Health Liver Support for drinkers!

With James's help, we sourced and secured only the best of the very best high-quality ingredients...

And each batch is manufactured in small, highly monitored conditions.

Because we believe shortcuts are for other companies, who sell cheap and poor quality ingredients.

Remember, the liver can spot low quality, so there is no point going there as many other companies do!

I guess money comes first for them, not you.

We have loved every minute of developing our supplement, which comes from a place of integrity.

Because we want you to receive what we know is of real value.

Remember we do not mass produce...

And we are happy with that...

Because we want to maintain the highest level of A-grade ingredients so they arrive at your door as fresh as they left us.

Our 3rd-Party Testing Process Ensures You Are Getting **The 'Gold' Standard Of Liver Support!**

With Word Of Mouth From One Drinker To Another, The Demand For Our Bridport Health Liver Support...

Has Gone Viral...

Gold Standard.

So here is what I suggest you do...

Remember, finding all the ingredients to make something 'similar' to this unique and one-off combination liver supplement would cost you in excess of \$400 a month...

Even then, you are still at high risk of choosing the wrong ingredients that aren't necessarily good for people who drink alcohol.

Not to mention low grade, poorly sourced cheap ingredients that have no 'real' efficacy.

Which down the track will be like throwing money down the drain as well as your liver health too.

As you can see, I've taken the pain away from figuring out the right combination of ingredients to put into this vital liver supplement formula.

The one thing left I needed to sort out which has taken me a bit longer than planned is getting the price down...

Because each ingredient's quality is so high... it took a little bit of convincing from the manufacturer...

However, they knew we were onto a winner here, so they gladly accepted a fair deal, so I could pass on the savings to you right now.

Today We Can Send You A Bottle Of Bridport Health Liver Support For **Just \$59 Which Is A Saving Of Over 25% Of Our Regular Price Of \$79**

But if you are anything like me...

You want to make sure you have a few months supply up your sleeve...

It's best to stock up now and order 3 bottles of Bridport Health Liver Support, and you'll save over 37% and get each bottle for just \$49 per bottle...

And when you decide you are fully committed to continuing your liver health journey as a drinker to maximize your ongoing success, then 6 bottles will be perfect for you.

And when you commit at that level, we'll reward you with a saving of over 50% per bottle.

This means you will only pay today per bottle \$39...

Which is cheaper than a good bottle of wine in a nice restaurant...

Imagine the feelings of relief that you are ahead of the game when it comes to looking after your liver...

Every single day without having to think about it!

Remember, this supplement you take every day for maximum results.

This means on the days you don't drink, you are supporting your liver even more...

Then the days when you drink, you are helping your liver process the alcohol so much better.

Of course, it is important to drink alcohol in a balanced and healthy way so you are not stressing your liver too much.

As well, as giving our liver supplement a good chance of working, so if you are worried about your drinking...

This Liver Supplement Will Be **The Best Solution For You!**

After clicking the add to cart button, you'll then be taken to a secure checkout form on the next page...

Simply fill out the secure form...

Click the order button...

And we will ship your order as soon as we receive it, so you get started as soon as...

And be on your way to a healthier and leaner liver!

Plus your entire order is 100% backed by a 90 Day Money Back Guarantee - if you change your mind for any reason and return your unopened bottles.

That's Right, You Get A Full 3 Months To Try Out Bridport Health Liver Support...

 90 Days Money Back Guarantee.

So, if you feel for any reason that you don't want to support your liver into a better space...

We completely respect your decision.

This is why we offer such a solid guarantee because we want you to take ownership of your own liver health, and if it's not a good fit...

Simply contact our customer service team.

We Are On A Mission To Help 5 Million Worried Drinkers Become Healthy 'Love My Liver' Buyers...

We Want You To Become One Of Our **5 Star Review Customers** Because We Know **How Important Loyalty Is!**

We run a tight small ship as a business and we pride ourselves on being awarded in the top 1% of customer service response time in the world!

Our customer service team knows me, and I know them all, and they have my direct email because we like to keep it as personal as possible.

 Researched and Tested.

So, I am pretty confident you will be happy with our product because we've done our homework on liver health support...

We've researched, tested and come up with what drinkers are saying is well overdue...

A uniquely formulated liver supplement that speaks to them and their concerns about their liver.

Remember we are a small boutique business that caters to a specialized market and we want to keep it that way.

We like being different and we like the fact that we know more about drinkers and their liver worries more than generic liver support producers.

Being a small boutique business, we are fortunate to work with the best in the industry and pride ourselves on traditional honest values.

We have what sadly seems to be an old fashioned motto these days...

The customer is always right!

We Stand By Our Brand, And We Stand With You To Support Your Liver Health From A Drinker's Perspective...

I doubt you will want a refund considering this is the first of its kind liver supplement for drinkers...

Because those who are worried about liver health need a solution that doesn't involve medical intervention that ironically causes more liver damage.

So ACT NOW While We Still Have Stock... You Have The Choice!

- 1** Think smart and act now by taking ownership of your own liver health.
- 2** Brace yourself for potential on-going deterioration of your liver and the health issues it may bring.
- 3** Keep your head in the sand and drink the way you are, put your liver fears to one side and then hope that one day there will be a miracle cure for liver health.

Taking control of liver health is a logical step after many years of drinking alcohol.

Bridport Health Liver Support is the perfect option for worried drinkers.

Imagine what it will be like 3 months from now where you can look at yourself in the mirror and know you've taken a major positive step towards **improving liver health**.

A decision you made because you know deep down that the years of drinking alcohol are starting to take its toll on your health.

I know drinkers are smart and savvy people, who want to get it right!

So stock up now while you still can.

I am super excited for you to start the journey of liver health.

If you have any questions regarding the tracking of your order...

It's easy for you to directly contact my team to answer any questions you may have.

Thank you so much for your interest in our Bridport Health Liver Support.

I can't wait to hear about your improved liver health!

Some **Important Questions** And **Answers** For Anybody Who Wants To Improve Their Liver Health Are Below...

Is This Supplement For Drinkers Only?

This supplement has been specifically developed for people who drink alcohol. However, it could also be used for people who are worried about general liver health.

If I Am Worried About My Liver, Should I Go And Get Blood Tests Or A Scan Of My Liver?

Can I Share My Bridport Health Liver Support With Other Worried Drinkers?

What If I Don't Feel It Is Benefiting My Liver?

Are There Any Other Liver Health Tips You Suggest?
